

## **README FIRST**

There are three **Excel** programs, **NETTING**, **DOME**, **BOSS** for solving various aspects for pressure vessel design. Along with the **Excel** programs are three **PDF** files that reflect the information contained in the book, "Filament Winding, Composite Structure Fabrication" that contain the technical support information. Finally there is a single **README** file that explains the operation of the three Excel programs. Along with this **README** file there are a total of eight files in the download package.
